

## RF System and Accesories

The RF Antenna protect exits of any size. This retail security system is an affordable solution to prevent theft and. protect all of your merchandise with hard security tags or security Labels. Hard tags and Security Labels are a great visual theft deterrent, and the detection system has both a visual and audible alarm. This system is easy to install and requires minimal maintenance.

### Features

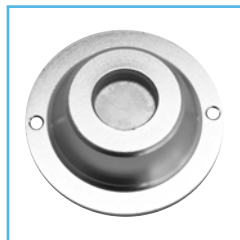

- With innovative design of electronics and DSP technology, the RF-EAS systems feature high signal-to-noise ratio and accordingly maintain high pick rate and strong noise immunity.
- 80cm ~ 150cm aisle width, lying on type of tags/labels, quality of power supply, noise level of environment, synchronization status and customer's requirement on the performance.
- Compatible with all kinds of 8.2-10 MHz RF labels and tags.
- Suitable for single-aisle, dual-aisle or multi-aisle configurations with synchronization capability.
- High capability to prevent false alarms caused by disturbances.
- Advanced signal processing technology helps in accurate detection and system reliability.
